EVO

A.A.G. Stucchi EVO is the evolution of the previous MULTISYSTEM, the first product range using **low-voltage technology** to develop a complete **track lighting system**.

Why low-voltage?

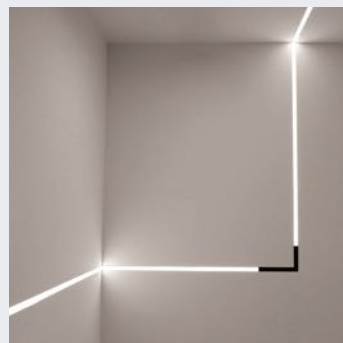

AESTHETIC ASPECT:

Low-voltage products are very small in size and have an iconic look

FUNCTIONAL ASPECT:

Low-voltage fixtures can be moved very easily. No technical action or specialist is required

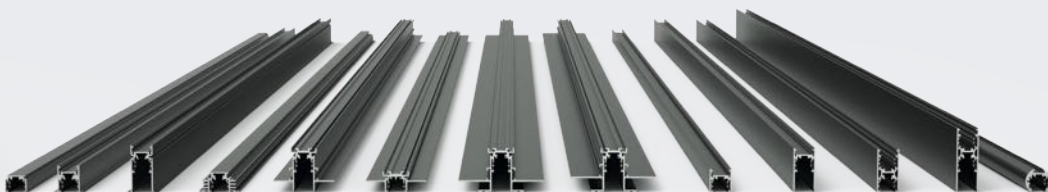

SAFETY ASPECT:

Low-voltage tracks can be used in applications where lighting fixtures are accessible to people with low risk of injury due to electrical shock

EVO tracks tech info
